# STELLAR INNOVATIONS & SOLUTIONS INC.

The Choice for Professional & Managed Services

## Who we are

Stellar Innovations & Solutions Inc., (SIS) was founded in 2008 by Ervin Freeman, a retired service-disabled veteran of the United States Air Force. SIS provides Professional Services & Information Technology (IT) Support and is fast emerging as an innovator with a record of success transforming customer’s business operations. Our success stems from an established corporate infrastructure, performing industry best practices backed by third-party certifications, and hiring and retaining quality personnel to support our customer missions. SIS is averaging about 90% of the time operating as the prime contractor on the contract and have strategically partnered with subcontractors about 1/3 of the time.

## Why SIS

SIS is a SDVO small business with a culture geared towards “doing IT the right way.” Our success has allowed investment in owning corporate facilities. These locations maintain top-secret facility clearances. Corporately, SIS has invested in and maintains CMMI and ISO certifications. These certifications drive our corporate culture to perform industry best practices.

Our staff has achieved higher-level degrees, maintain certifications, clearances, and are committed to supporting the customer mission. Our SDVO and 8(a) status will assist in fulfilling agency and department socio-economic contracting goals.
